1.2	Links	3
1.3	Images	3
1.4	Code Blocks	4
1.5	Admonitions	4
1.6	MDX and React Components	5

1 Markdown Features

Docusaurus supports **Markdown** and a few **additional features**.

1.1 Front Matter

Markdown documents have metadata at the top called **Front Matter**:

my-doc.md

```
---  
  
id: my-doc-id  
  
title: My document title  
  
description: My document description  
  
slug: /my-custom-url  
  
---  
  
## Markdown heading  
  
Markdown text with [links](./hello.md)
```

1.2 Links

Regular Markdown links are supported, using url paths or relative file paths.

```
Let's see how to [Create a page](/create-a-page).
```

```
Let's see how to [Create a page](./create-a-page.md).
```

Result: Let's see how to [Create a page](#).

1.3 Images

Regular Markdown images are supported.

You can use absolute paths to reference images in the static directory (`static/img/docusaurus.png`):

You can reference images relative to the current file as well. This is particularly useful to colocate images close to the Markdown files using them:

1.4 Code Blocks

Markdown code blocks are supported with Syntax highlighting.

```
```jsx title="src/components/HelloDocusaurus.js"
function HelloDocusaurus() {
 return <h1>Hello, Docusaurus!</h1>;
}
```
```

```
src/components/HelloDocusaurus.js

function HelloDocusaurus() {
  return <h1>Hello, Docusaurus!</h1>;
}
```

1.5 Admonitions

Docusaurus has a special syntax to create admonitions and callouts:

```
:::tip My tip

Use this awesome feature option

:::

:::danger Take care

This action is dangerous

:::
```

:::tip My tip

Use this awesome feature option

⋮

⋮:danger Take care

This action is dangerous

⋮

1.6 MDX and React Components

MDX can make your documentation more **interactive** and allows using any **React components inside Markdown**:

```
export const Highlight = ({children, color}) => (
  <span
    style={{
      backgroundColor: color,
      borderRadius: '20px',
      color: '#fff',
      padding: '10px',
      cursor: 'pointer',
    }}
    onClick={() => {
      alert(`You clicked the color ${color} with label ${children}`)
    }}>
    {children}
  </span>
);

This is <Highlight color="#25c2a0">Docusaurus green</Highlight> !

This is <Highlight color="#1877F2">Facebook blue</Highlight> !
```

This is Docusaurus green !

This is Facebook blue !
